

JIGAWA STATE
FACTS AND FIGURES
2013

PREPARED BY STATISTICS, MONITORING AND EVALUATION DEPARTMENT,
BUDGET AND ECONOMIC PLANNING DIRECTORATE, JIGAWA STATE

MAP OF NIGERIA SHOWING JIGAWA STATE

ACKNOWLEDGEMENT

First and foremost our sincere appreciations go to the Governor of Jigawa state under able leadership of His Excellency Alh. (Dr) Sule Lamido CON for moral and financial support provided to the State Statistical Agency in making the Jigawa State Facts and Figures a reality.

We also sincerely acknowledge the contribution of Development partners such as National Bureau of Statistics and SPARC for their role toward the development of State Statistical activities.

We also commend the entire staff of Statistics, Monitoring and Evaluation Department for their tireless efforts in collection and collation of data that make the publication possible.

In addition, the contribution of entire staff of Budget and Economic Planning Directorate for putting heads together to produce this handbook is acknowledged.

Our appreciation goes to the State Ministries, Department and Agencies, Federal parastatal for supplying the necessary information presented in this publication.

Hamisu Mamman Kwallam
Director Statistics, Monitoring and Evaluation.

FOREWORD

This is the first edition of JIGAWA STATE FACTS AND FIGURES' published by Statistics, Monitoring and Evaluation Department of Budget and Economic Planning Directorate, Ministry of Finance and Economic Planning, Jigawa State. The publication is intended to provide information and data in a concise, readily available and accessible form.

This hand book is one of the series of the Statistical publications produced by Jigawa State Statistical Agency in its effort to provide available relevant data that will be useful to the policy makers for policy formulation, Socioeconomic planning and indeed anybody interested in facts that affect his or her life.

Comments, suggestions and constructive criticisms are highly welcome for the improvement of future publications.

Adamu Muhammad Garun Gobas
Permanent Secretary
Directorate of Budget & Economic Planning, Jigawa State.

Profile of Jigawa State

1.1 Location Jigawa: State is one of thirty-six States that constitutes Federal Republic of Nigeria. It is situated in northwestern part of the country between Latitudes 11.00°N to 13.00°N and Longitudes 8.00°E to 10.15°E. Kano and Katsina States border Jigawa to the west, Bauchi State to the east and Yobe State to the northeast. To the north, Jigawa shares an international border with Republic of Niger, which is a unique opportunity for cross-border trading activities. Government readily took advantage of this by initiating and establishing a Free-Trade Zone at the Border town of Maigatari.

1.2 Topography: The State has a total land area of approximately 24,742 square kilometers. Its topography is generally characterized by undulating land, with sand dunes of various sizes spanning several kilometers in parts of the State. The southern part of Jigawa comprises the Basement Complex while the northeast is made up of sedimentary rocks of the Chad Formation. The main rivers are Hadejia, Kafin Hausa and Iggi Rivers with a number of tributaries feeding extensive marshlands in northeastern part of the State. Hadejia-KafinHausa River traverses the State from west to east through the Hadejia-Nguru wetlands and empties into Lake Chad Basin.

1.3 Climate: Jigawa enjoys a Tropical climate characterized by two main seasons; the rain season brought by the humid south westerly breezes from the far away Atlantic coast of West Africa (May to September); and the "harmatan" season of dry, dusty north easterly winds of the Sahara desert (from November to April).

Maximum temperatures (up to about 40°C) are recorded between the months of March to September, whereas lower temperatures, especially at night time during the harmatan season, are sometimes as low as 11°C, characterize the period between October and February. There is a substantial day time/ night time temperature variation during this period. Annual rainfall is between 600mm to 1,000mm with an average of about 650 mm over the last few years.

1.4 Vegetation: Most parts of the State lie within the Sudan Savannah with elements of Guinea Savannah in the southern part. Total forest cover in the State is very much below national average of 14.8%¹. Due to both natural and human factors, forest cover is being depleted, making northern part of the State highly vulnerable to desert encroachment. The State enjoys vast fertile arable land which almost all tropical crops could adapt, thus constituting one of its highly prized natural resources. The Sudan Savannah vegetation zone is also made up of vast grazing lands suitable for livestock production.

1.5 - Population Dynamics: About 4.3 million people inhabit Jigawa State. Life expectancy as at 2001 was about 52 years and this has dropped to 47 years by 2008 .The state total fertility rate is 6.7

¹ UNDP 2003 Human Development Report

JIGAWA STATE FACTS AND FIGURES 2013
The State Government administrative apparatus is organized into Ministries, Extra-ministerial Departments and Parastatals, which are located across the three Senatorial districts in the State since 1999. This decentralized approach in Government's administrative structure was seen as a move towards stimulating economic activities, socio-economic development and empowerment over a wider area since government is the largest employer, perhaps second only to agriculture. In addition, this was also seen as a way for spreading even development among major urban centers and a shift from "city-state syndrome" that obtained in the old Kano State.

1.7 - Political Economy: The Economy of Jigawa State is largely characterized by informal sector activities with agriculture as the major economic activity. Over 80% of the population is engaged in subsistence farming and animal husbandry. Trade and commerce are undertaken on small and medium scale, especially in agricultural goods, livestock and other consumer goods. Other informal sector activities include blacksmithing, leather-works, tailoring services, auto repairs, metal works, carpentry, tanning, dyeing, food processing, masonry etc. Even though modern industrial sector is yet to gain a solid footing, the seed for their development was planted through establishment of small-scale industries particularly in areas of food processing and other agro-allied activities.

The Federal Office of Statistics, in 2001, classified Jigawa State among those with relatively high severity and incidence of poverty in the country, with a Gross Per Capita Income of N35, 000 per annum (US\$290), which is below the National Average. However, the 2006 Core Welfare Indicators

JIGAWA STATE FACTS AND FIGURES 2013
Questionnaire (CWIQ) Survey indicated that over 52% of the population do not consider themselves as poor. The CWIQ survey conducted 2012 by the Jigawa State Government in collaboration with National Bureau of Statistics indicate that the poverty situation of the state has drastically improved because it indicated that over 55% of the population do not consider themselves as poor.

The State of infrastructure for economic development such as roads, electricity, telecommunication and information technology have recently witnessed tremendous improvements through massive rehabilitation and expansion works. With massive road rehabilitation/construction projects already undertaken throughout the State during the last five years, coupled with efforts made towards power generation via Independent Power Platforms, and the Internet Broadband Project, investment climate in Jigawa State in terms of economic infrastructure is quite promising. It is also worth noting the efforts made by the government to attract investment into the state by organizing the investment summit were investor both within and outside the state were sensitive on the opportunities available in the state.

and 59 while 2.4% were people aged 60 and above. This survey reveals a dependency ratio of almost 1; meaning that there is almost one dependent to every economically active person in the population. Average household size was about 7 almost all of which were headed by males. About 60% of household heads were self-employed with agriculture as their main occupation, and nearly two-thirds of these households were monogamous families. The overall literacy rate was about 37% in 2002 (22 percent for women and 51 percent for men). School enrolment ratio is fairly high with very good improvements in the last few years, even though there is still clear disparity between boys and girls.

Basic indicators for water supply sector show that access to potable water is over 90%, which is among the highest in the country. The 2012 CWIQ Survey however, indicated that while access to high quality safe drinking water (pipe borne, hand pump boreholes and protected wells) is about 79%, nearly 67% of households have good means of sanitation. In terms of health services, about 64.% of the population have access to medical services which is, however, higher in urban areas where access was found to be about 72.4%. The CWIQ Survey found that an average of 70% of those who consulted a health facility expressed satisfaction with the services provided.

The socio-cultural situation in Jigawa State could be described as homogeneous with Hausa/Fulani found in all parts of the State. Kanuri are largely found in Hadejia Emirate, with some traces of Badawa mainly in its Northeastern parts. Even though each of the three dominant tribes has continued to maintain its ethnic identity, Islam and a long history of inter-marriages have continued to bind them together.

1.6 Government: Jigawa State - which was created out of old Kano State in August 1991 - is one of the 36 States in Federal Republic of Nigeria. As per 1999 Constitution of Federal Republic of Nigeria, the State comprises 27 Local Government Councils, which are divided into 30 State Constituencies, grouped into 11 Federal Constituencies and 3 Senatorial Districts.

In line with the democratic setting in the country, the governments at both the State and Local Government levels are elected, and comprise an Executive with a unicameral legislature. The State legislature has 30 elected members each representing one of the State Constituencies. To complete the State governance structure, there is an independent State Judiciary as the third arm of Government.

Table 33: SOLID MINERAL RESOURCES AVAILABLE IN JIGAWA STATE

S/NO	MINERAL	POSSIBLE RESERVE	LOCAL GOVERNMENT
1	KAOLINE	Over 25 million Tons	Birnin Kudu, Gwaram, Roni
2	Limestone	Over 100 million Tons	Auyo, Birniwa, Gumei, Hadeija, Kaugama, Malam Madori
3	Glass Sand	Over 200 million Tons	All over the 5 Emirates (Hadeija, Gumei, Dutse, Kazaure & Ringim)
4	Tin and Columbite	Large Quantity	Gwaram, Fagam, Kazaure
5	Trona (Soda Ash)	Large Quantity	BIRNIWA & KIRIKASAMMA
6	Gemstone Tourmaline Topaz & Ame thyst Aquamarine	Large Quantity	Birnin Kudu, Gwaram
7	Bentonite Clay	Over 50 million Tons	Birnin Kudu, Diginisa, Babura , Garki
8	Cassiterite Columbite & Tantalite	Large Quantity	Gwaram, Fagam, Kazaure
9	Irin Ore	Vary Large Quantity	
10	Feldspar	Vary Large Quantity	Dutse, Gwiwa, Kazaure, Roni
11	Dimension Stone Granite	50 million Tons	All over the Basement Area (Kazaure, Roni, Gwiwa, Dutse, Birnin Kudu, Bujii, Gwaram)
12	Copper ,Gold and Zinc	Large Quantity	Kazaure, Roni,Yankwashi
